CONTENTS

Vol. XLV, Issue Nos. 145–146

Journal of Polymer Science

ISSUE NO. 145, JULY

ALFRED H. FRYE and RAYMOND W. HORST: The Mechanism of Polyvinyl Chloride Stabilization by Barium, Cadmium, and Zinc Carboxylates. II. Radioactive Tracer Studies 1

C. S. MARVEL, YUKIO SHIMURA, and F. C. MAGNE: Copolymers of Vinyl Chloride and Some Vinyl Esters of Acids Derived from Pinene 13

C. S. MARVEL and CHARLES C. L. HWA: Polymyrcene 25

RICHARD G. SCHMITT AND ROBERT C. HIRT: Investigation of the Protective Ultraviolet Absorbers in a Space Environment. I. Rate of Evaporation and Vapor Pressure Studies 35

DONALD J. LYMAN: Polyurethanes. I. The Solution Polymerization of Diisocyanates with Ethylene Glycol 49

C. E. ROGERS, V. STANNETT, and M. SZWARC: The Sorption, Diffusion, and Permeation of Organic Vapors in Polyethylene 61

G. F. D'ALELIO, A. B. FINESTONE, L. TAFT, and T. J. MIRANDA: The Polymerization of Allylbenzene with Heterogeneous Catalysts 83

M. KAKUDO and R. ULLMAN: Polyethylene Crystallinity from X-Ray Studies 91

RALPH L. DANNLEY and MANUEL ESAYIAN: An Investigation of Lead Tetraacetate, *N*-Bromosuccinimide, *p*-Toluenesulfonyl Azide, Benzenediazonium Fluoborate, and Saccharine–Dimethylaniline as Chain Initiators 105

F. S. DAINTON, D. M. WILES, and A. N. WRIGHT. Blue Solutions of Potassium in Ethers as Initiators of Anionic Polymerization ... 111

HENRY L. FRIEDMAN: Thermal Degradation of Plastics. I. The Kinetics of Polymer Chain Degradation 119

C. G. OVERBERGER, H. YUKI, and N. URAKAWA: Polymerization of Methacrylonitrile with Potassium in Ammonia 127

AKIYOSHI WADA: Dielectric Properties of Polypeptide Solutions. V. Molecular Association of the α-Helix in Solution 145

KATSUHIKO ITO: Evaluation of Surface Treatment of Glass Fiber in Fabric-Reinforced Plastics 155

G. W. URBAŃCZYK: Determination of Polycaprolactam Fiber Crystallinity by X-Ray Differential-Filtration Method 161

GEORGE E. HAM: Expansion of Copolymerization Theory (Influence of Neighboring Units on Radical Reactivity with Monomers) .. 169

GEORGE E. HAM: Application of an Expanded Copolymerization Equation to the System Styrene–Fumaronitrile 177

GEORGE E. HAM: Application of an Expanded Copolymerization Theory to Systems Involving α-Methylstyrene 183
K. F. O'DRISCOLL and J. F. SCHMIDT: Polymerization with Redox Initiators. II. The System Styrene–Benzoyl Peroxide–Dimethylaniline at Elevated Temperatures 189
R. J. KERN, H. G. HURST, and W. R. RICHARD: Triethylaluminum–Titanium Tetrachloride Catalysts for Preparation of Crystalline Polystyrene 195
FRANK L. PILAR: The Flow of Gases Through High Polymer Films in Equilibrium with Sorbed Vapors 205
WILLIAM R. JOHNSON and CHARLES C. PRICE: Shear Degradation of Vinyl Polymers in Dilute Solution by High-Speed Stirring 217

LETTERS TO THE EDITORS

J. P. KENNEDY and R. M. THOMAS: Polymerization of Isobutene Using Radioactive Methyl Chloride 227
J. P. KENNEDY and R. M. THOMAS: Polymerization of Isobutene at Ultra Low Temperatures 229
AKIRA MIYAKE: Extension of the Schulz-Zimm Molecular Weight Distribution Function 230
ATSUO NISHIOKA, HARUAKI WATANABE, ICHIRO YAMAGUCHI, and HIROSHI SHIMIZU: High Resolution NMR Spectra of Isotactic and Syndiotactic Polymethyl Methacrylate in Chloroform Solution 232
P. J. FLORY, A. CIFERRI, and C. A. J. HOEVE: The Thermodynamic Analysis of Thermoelastic Measurements on High Elastic Materials 235
C. B. CHAPMAN: The Determination of Tacticity Constants from Hydrolytic Measurements 237
J. C. W. CHIEN and JOHN F. WALKER: Measurement of Geometrical Isomerism in Polyesters by Nuclear Magnetic Resonance 239
F. E. BAILEY, JR., and H. G. FRANCE: Rates of Polymerization and Relative Copolymerization Rates of Some Epoxides in the Formation of Linear Polyethers 243
P. EHRLICH and E. B. GRAHAM: Solubility of Polymers in Compressed Gases 246
CATHERINE S. H. CHEN, NORMAN COLTHUP, WILLIAM DEICHERT, and RICHARD L. WEBB: Formation of Keteneimine Structures During Polymerization of Acrylonitrile with X-Rays 247
F. C. LEAVITT and L. U. MATTERNAS: Polylithiostyrene 249
WENDELL P. LONG: Cyclopentadienyltitanium Trichloride–Alkyl Aluminum Chloride Catalysts for Ethylene Polymerization 250

NOTES

C. JOUWERSMA: On the Theory of Peeling 253
J. E. MCNUTT and G. M. ANDES: Wetting of Heterogeneous Surfaces 255
R. RADO and M. LAZĂR: The Decomposition of Benzoyl Peroxide in Polyethylene 257
G. H. CRAWFORD: Nitric Oxide Addition in Tetrafluoroethylene. Copolymerization of the Adducts 259
LENNART SCHOTTE and GÖRAN BERGSON: A Note on the Structure and Properties of Thiokols 261

KEN NORO and HIROSHI KAWAZURA: Vinyl Polymerization with Ammonia–Triethylboron 264
ALBERT S. MATLACK and DAVID S. BRESLOW: Crystalline Polynitrostyrenes 265
F. BUECHE and FRANK N. KELLEY: Shear Viscosity–Molecular Weight Relationships for Polymers 267
H. H. G. JELLINEK and E. N. LYNN: Heat of Aqueous Immersion of Polymers 269
R. H. WILEY and M. T. LIPSCOMB: γ-Radiation-Induced Polymerization of Styrene 271

SUBJECT INDEX, VOLUME XLV

Acrylamide, polymerization in crystalline state, 475
Acrylonitrile, polymerization with x-rays, 247
Alkylene dichlorides, polycondensation with alkylene polyamines, 289
Alkylene polyamines, polycondensation with alkylene dichlorides, 289
Allyl acetate, polymerization, 379
Allylbenzene, polymerization with heterogeneous catalysts, 83
Amine crosslinking, fluoroelastomers, 405
Anionic polymerization, potassium–ether solutions as initiators, 111
Benzoyl peroxide, decomposition in polyethylene, 257
Branching, and network defects, 397
Carboxylates, barium, cadmium, and zinc, polyvinyl chloride stabilization, 1
Catalysts, for ethylene polymerization, 250
  heterogeneous, for allylbenzene polymerization, 83
  for preparation of crystalline polystyrene, 195
Cellulosics, crosslinking by high energy radiation, 536
Chain degradation, thermal, 119
Chain initiators, investigation, 105
Chain polymers, heat capacity at low temperatures, 525
Chain scission, and molecular weight distribution, 541
Chromatography, precipitation, 443
Copolymerization theory, expanded, 169, 177, 183
Crosslinking, cellulosics, by high energy radiation, 536
  elastomers, measurement, 341
  fluoroelastomers, mechanism, 405
  and molecular weight distribution, 541
Crystallinity, polycaprolactam fiber, 161
  polyethylene, x-ray study, 91
  polynitrostyrenes, 265
Crystallization, polyethylene, 521
Decomposition, benzoyl peroxide, in polyethylene, 257
Degradation, polyethylene, oxidative, 451
  polytetrafluoroethylene, by ionizing radiation, 534
  styrene–butadiene rubber, by ozone, 415
Dielectric properties, polypeptide solutions, 145
Diethyl fumarate, γ-radiation-induced homopolymerization, 503
Diffusion, organic vapors, in polyethylene, 61
Elastic materials, thermoelastic measurements, 235
Elastomers, measurement of degree of crosslinking, 341
Epoxides, in formation of linear polyethers, 243
Equilibrium polymerization, α-methylstyrene, 347
Ethylene, polymerization, catalysts, 250
Evaporation, protective ultraviolet absorbers, 35
Extinction patterns, polymer spherulites, 531
Fabric-reinforced plastics, treatment of glass fiber, 155

Fibers, polycaprolactam, x-ray determination of crystallinity, 161
glass, surface treatment evaluation, 155
Fluoroelastomers, mechanism of amine crosslinking, 405
Fractionation, successive precipitation, 443
Fumaronitrile, copolymerization with styrene, theory, 177
Gamma radiation, in diethyl fumarate homopolymerization, 503
in styrene polymerization, 271
Gases, flow through polymer films in equilibrium with sorbed vapors, 205
Gel formation, theory, 305
Glass fiber, evaluation of surface treatment, 155
Heat of aqueous immersion, polymers, 269
Heat capacity, chain polymers, 525
High energy radiation, crosslinking of cellulosics, 536
Homopolymerization, diethyl fumarate, 503
Hydrogen–deuterium exchange, polypropylene, 435
Initiation, anionic polymerization by potassium–ether solutions, 111
Initiators, equilibrium polymerization of α-methylstyrene, 347
investigation, 105
redox, 189
Ionizing radiation, degradation of polytetrafluoroethylene, 534
polymerization of methacrylonitrile, 469
Isobutene, polymerization, 227, 229
Isotactic polymethacrylic acid, solution properties, 538
Keteneimines, formation in x-ray polymerization of acrylonitrile, 247
Light scattering, from polyethylenes with ringed spherulites, 519
Methacrylic acid, ester copolymers, 461
Methacrylonitrile, polymerization induced by ionizing radiation, 469
polymerization with potassium in ammonia, 127
Methyl chloride, in polymerization of isobutene, 227
4-Methyl-1-pentene, Ziegler polymerization, 509
α-Methylstyrene, application of copolymerization theory, 183
equilibrium polymerization, 347
Molecular association, in polypeptide solutions, 145
Molecular weight, shear viscosity relationship, 267
Molecular weight distribution, effect on polymers undergoing crosslinking and chain scission, 541
extension of Schulz-Zimm function, 230
Nitric oxide, addition in tetrafluoroethylene, 259
Nuclear magnetic resonance, for determining geometrical isomerism in polyesters, 239
in isotactic and syndiotactic polymethyl methacrylate, 232
Nylon 8, polymorphism, 546
Optically active polymers, synthesis by asymmetric induction, 313
Oxidative degradation, polyethylene, 451
Ozone degradation, SBR, 415
Peeling, theory, 253
Permeation, organic vapors, in polyethylene, 61
Pinene, vinyl esters of acid derivatives, vinyl chloride copolymers, 13
Polyamides, proton magnetic resonance, 367
Polycaprolactam, second virial coefficient in formic acid, 524
Polycaprolactam fiber, x-ray determination of crystallinity, 161
Poly-4′-*cis*-benzalacetophenone, 325
Polycondensation, alkylene dichlorides and alkylene polyamines, 289
Polyesters, NMR measurement of geometrical isomerism, 239
Polyethers, linear, formation from epoxides, 243
Polyethylene, crystallinity, 91
crystallization, 521
decomposition of benzoyl peroxide in, 257
light scattering from samples with ringed spherulites, 519
oxidative degradation, 451
sorption, diffusion, and permeation of organic vapors, 61
Polylithiostyrene, 249
Polymer chains, heat capacity, 525
internal rotation, 528
Polymer films, flow of gases through, 205
Polymers, branching and network defects, 397
heat of aqueous immersion, 269
shear viscosity–molecular weight relationships, 267
solubility in compressed gases, 246
thermal chain degradation, 119
Polymethacrylic acid, isotactic, solution properties, 538
Polymethyl methacrylate, isotactic and syndiotactic, NMR spectra, 232
Polymorphism, nylon 8, 546
Polymyrcene, 25
Polynitrostyrenes, crystalline, 265
Polypeptide solutions, dielectric properties, 145
Polypropylene, hydrogen–deuterium exchange, 435
Polystyrene, crystalline, catalysts for preparation, 195
proton resonance in solution, 530
Polytetrafluoroethylene, degradation by ionizing radiation, 534
Polyurethanes, 49
Polyvinyl chloride, stabilization by metal carboxylates, 1
Potassium solutions, in ammonia, in methacrylonitrile polymerization, 127
in ethers, initiators of anionic polymerization, 111
Proton magnetic resonance, polyamides, 367
polystyrene solutions, 530

Radical reactivity with monomers, expanded copolymerization theory, 169, 177, 183
Redox initiation, styrene polymerization, 189
Rubber, styrene–butadiene, ozone degradation, 415
Second virial coefficient, polycaprolactam, in dilute formic acid, 524
Shear degradation, vinyl polymers in dilute solution, 217
Shear viscosity, molecular weight relationship, 267
Solubility, polymers, in compressed gases, 246
Solution polymerization, diisocyanates with ethylene glycol, 49
Solution properties, isotactic polymethacrylic acid, 538
Sorption, organic vapors, in polyethylene, 61
Spherulites, extinction patterns, 531
  ringed, in polyethylene, 519
Stabilization, polyvinyl chloride, by metal carboxylates, 1
Styrene, copolymerization with fumaronitrile, theory, 177
  γ-radiation-induced polymerization, 271
  redox initiation of polymerization at elevated temperatures, 189
Surfaces, heterogeneous, wetting, 255
Surface treatment, glass fiber in fabric-reinforced plastics, 155
Tacticity, and reaction kinetics, methacrylic acid–ester copolymers, 461
Tacticity constants, determination from hydrolytic measurements, 237
Tetrafluoroethylene, nitric oxide addition, 259
Thermal degradation, kinetics, 119
Thermoelastic measurements, thermodynamic analysis, 235
Thiokols, structure and properties, 261
Ultraviolet absorbers, in space environment, 35
Vinyl chloride, copolymers with vinyl esters of acids from pinene, 13
Vinyl polymerization, with ammonia–triethylboron, 264
Vinyl polymers, optically active, synthesis, 313
  shear degradation, 217
Wetting, heterogeneous surfaces, 255
X-radiation, determination of polycaprolactam fiber crystallinity, 161
  polymerization of acrylonitrile, 247
  studies of polyethylene crystallinity, 91
Ziegler polymerization, 4-methyl-1-pentene, 509
